### Technical Skills

- Front-End: HTML, CSS, JavaScript, TypeScript, ReactJS, NextJS, Angular, Redux Tool-Kit
- Back-End: NodeJS, ExpressJS, Flask
- Database: MongoDB, SQLite3, PostgreSQL
- Other Relevant Tools/Technologies/Frameworks: GitHub, Zustand, Vercel

### Education

University of Ibadan February 2021 – Present  
*Bachelor of Science in Engineering* *Ibadan, Nigeria*

Harvard University (Online Course) September 2022 – April 2023  
*CS50x – Introduction to Computer Science* • [Certificate](#) *edX*

### Professional Experience

Junior Front-End Developer (REMOTE) Sept 2024 – Present  
Sell Media Group • [Link](#)

- Collaborated on the flagship product, SellCrea8, by transforming Figma designs into pixel-perfect, responsive interface.
- Integrated RESTful APIs to enable seamless data flow between the frontend and backend, leveraging Postman for testing.
- Implemented custom skeleton loading states for data fetching from the backend, enhancing the overall user experience by improving perceived performance and providing clear visual feedback.
- Developed email templates for various use cases, ensuring they followed best practices and guidelines to ensure compatibility and proper rendering across different email clients, including Gmail and Outlook.

Full-Stack Web Developer (REMOTE) May 2024 – July 2024  
Walking In the Spirit of Excellence Foundation • [Link](#)

- Developed the official website for the foundation using NextJS in order to increase technical SEO traffic
- Integrated Stripe as a payment gateway for a seamless donation feature system.
- Developed a custom CRM for the website to efficiently manage donations and donor information.

### Selected Projects

[KeyCount](#) | A VS Code Extension Dec 2024

- Built a simple, lightweight extension that keeps track and count of the number of times a keyboard button or letter was pressed while you work.

[AirBNB Design Clone](#) | Angular, Tailwind CSS, Swiper.js, TypeScript, Google Icons March 2024

- Replicated the intuitive and user-friendly interface of the popular vacation rental platform, AirBNB.
- Implemented the homepage design features and functionalities using dummy data such as house filtering and price display (with taxes).
- Designed additional pages such as booking room pages.

[Intertwined](#) | ReactJS, Tailwind CSS, ExpressJS, MongoDB, NodeJS, WebSockets Dec 2023

- Built a platform for people in need of manual services to find and connect with people capable of rendering those services
- Implemented a robust and scalable backend to handle request filtering efficiently.
- Developed robust user authentication, including Single Sign-On (SSO) with Google.
